Nadia LAHYA

DevOps Engineering Apprentice

Montpellier, France | nadia.lahya@outlook.com | nlahya.dev
linkedin.com/in/nadia-lahya-0b357a330 | github.com/nadouulh | ORCiD

Summary

Fourth-year DevOps engineering student at Polytech Montpellier, on a work-study contract at RAILwAI, where I work on CI/CD pipelines and a hybrid cloud and on-premise infrastructure as code. Looking for an **internship in DevOps, Cloud or AI from June to September 2027** (minimum 9 weeks).

Skills

Cloud & Infrastructure: GCP, Scaleway, Proxmox, Terraform, OpenTofu, Ansible, Docker, Kubernetes, Talos Linux
CI/CD & Quality: Bitbucket Pipelines, GitLab CI, GitHub Actions, Argo CD, pre-commit, Trivy, code reviews
Programming: Bash, Python, Rust, Java, C, TypeScript, JavaScript, React, FastAPI, Spring Boot, Symfony
Systems & Databases: Linux, Windows, PostgreSQL, MySQL, MongoDB
Methods: Git, Agile/Scrum, Infrastructure as Code, Architecture Decision Records (ADR), technical documentation

Experience

DevOps Engineering Apprentice Oct 2025 – Now
RAILwAI (rail-tech start-up using AI for railway maintenance), Montpellier, France

- Build and maintain **CI pipelines** in Bitbucket Pipelines, with **pre-commit** hooks and **Trivy** security scans
- Maintain and evolve a hybrid infrastructure (**GCP**, **Scaleway** and on-premise) as code with **Terraform/OpenTofu**
- Work with developers to understand their solutions before deploying them, and review teammates' code
- Automate recurring tasks and write technical documentation

AI Research Intern – Load estimation for ergonomic assessment Mar 2025 – Jun 2025
IMT Mines Alès (CERIS) & EuroMov Digital Health in Motion, Alès, France

- Estimated the load a worker carries (empty, light, heavy) from **RGB video** only, for REBA ergonomic scoring
- Helped record **ViLoad**, a new multi-view video + IMU dataset (8 participants, 144 videos, Xsens sensors)
- Fine-tuned two models: **MobileNetV2** and **R3D-18**, about 50% accuracy on 3 classes
- Results published in an ACM paper and presented as a poster at the **International Conference on Movement and Computing (MOCO'26)**, with an open dataset and code

Education

Apprentice engineering degree in DevOps (4th of 5 years, graduating 2028) – Polytech, Montpellier Oct 2025 – Now
2-year university qualification in Computer Science – University Institute of Technology, Valence Sep 2023 – Jun 2025
2 years of general engineering studies before specialisation – Polytech, Montpellier Sep 2021 – Jun 2023
High School Diploma with honours (Maths, Computer Science) – La Salle High School, Alès Jun 2021

Projects

Omni (tutored team project) | *OpenTofu, Kubernetes, Talos, Proxmox* May 2026 – Now | *open source soon*

- Self-hostable collaboration suite (Visio, Vault, Admin panel, Drive)
- Migrating from Dokku to **Kubernetes**: **OpenTofu** provisioning of the **Proxmox** cluster (VXLAN networks, Debian routers, **Talos Linux** VMs) for staging and production, documented for the team with **ADRs**

Barenetes (open source) | *Rust, gRPC, mTLS* Jun 2026 – Sep 2026 | GitHub

- Contributor to a minimal reimplementation of **Kubernetes** in **Rust**
- Member of the sub-team in charge of the **API server**, which the other components call over **gRPC**

DoRémix (school project) | *Python, FastAPI, Typer, PostgreSQL, Docker* Dec 2025 – Apr 2026 | GitHub

- Web app and CLI to create and share community playlists built from **YouTube** links
- **FastAPI** backend with PostgreSQL, Typer CLI, **Docker Compose** dev/prod setups, pytest tests and API rate limiting

Languages, Soft Skills & Interests

Languages: French (native), Italian (native), Arabic (native), English (professional working proficiency)
Soft skills: Communication, teamwork, giving and receiving feedback, fast learning, rigor, autonomy
Interests: Karate (7 years, individual and team), drawing, photography, calligraphy, neuroscience, travel
